Henderson Engineers, Inc. explores options; relocates within Lenexa

LENEXA, Kan. – In a multi-million dollar agreement, Henderson Engineers, Inc. announces today that it is moving its National Headquarters to a newer 84,500 SF space within the Pine Ridge East Business Park in Lenexa, Kansas. After a lengthy research period, which included exploring different leasing and ownership options, a lease was signed last week for the building at 8345 Lenexa Drive, just east of Henderson’s current location. The relocation will be a phased move beginning in January 2012 with complete occupation by spring of 2012. Henderson, with over 450 employees firm wide, will occupy the majority of three floors of the building allowing for more space for current operations as well as future growth. Construction is set to begin within 30 days and the project will be designed, constructed and certified to meet the LEED rating system for Commercial Interiors, the green benchmark for the tenant improvement market.

“Being an employee focused organization, our internal research indicated an overall preference to remain in the same general area,” said Duane Henderson, President and CEO. “Lenexa has been a great address for us over the last 20 years and this will be the sixth building we have occupied within the city.”

“Relocating to this office space, with its increased square footage, amenities and corporate presence, is another sign of our growth and progression,” said Rich Smith, Executive Vice President. “It further solidifies us as a true local, regional and national consulting engineering firm.”
