Henderson Engineers, Inc. announces opening of Tampa and Las Vegas offices

Kansas City, Mo. - Henderson Engineers, Inc. recently announced it has opened offices in Tampa, Fla. and Las Vegas, Nev. The expansion is part of Henderson's plan to provide quality engineering services at a national level, with already established offices in Kansas City, Dallas, Houston, Phoenix and Bentonville. In operation since 1970, Henderson has experienced unprecedented growth in the last several years and currently employs over 400.

"Our national office expansion is driven by our clients and represents our intention to be responsive at all levels within our company," said Rich Smith, Executive Vice President.

Currently the Las Vegas office's priority is the Las Vegas Convention Center, an \$890 million renovation and expansion project Henderson is working on with HNTB Architecture. Tom Montgomery, a Senior Associate with 36 years of experience, heads the office as the Director of Las Vegas operations.

Henderson opened its Tampa office to support the company's growing clientele in the state of Florida as well as the Southeast region of the country. The unique design challenges associated with the region have created opportunities for Henderson to expand its services. Mike Gallagher heads the office as the Director of Tampa operations.

Both offices offer a full range of mechanical, electrical and plumbing design services, as well as architectural lighting, fire protection and technology design.

About Henderson Engineers, Inc.
