Henderson Engineers, Inc. opens Manhattan, Kan. office

Lenexa, Kan. – Henderson Engineers, Inc. (HEI) announced today the opening of their new Manhattan, Kan. branch office located in Aggieville. The office will be headed by HEI Vice President Marc Feyh and supported by 14 rotating HEI employees and Kansas State University students who were previously interns with the company. The office will be used primarily for recruiting purposes as well as giving past interns additional experience.

“We have a great history with Kansas State and hope the Manhattan office will allow us to keep our finger on the pulse of the university as well as giving interns the ability to continue their learning experience throughout the school year,” said Rich Smith, Executive Vice President. [“Many of our employees start with HEI as interns; by giving them ample real world experience it allows for a smooth transition after graduation.”]

HEI President and CEO Duane Henderson graduated from Kansas State University in 1982 with a Bachelor of Science degree in Architectural Engineering. In 2007 HEI established the Henderson Engineers, Inc. scholarship for fourth and fifth year architectural engineering students at Kansas State University.
